Career Objective

Dedicated Machine Learning Engineer passionate about leveraging data-driven insights to solve business challenges. Seeking to apply expertise in Python, TensorFlow, and cloud-based model deployment to drive innovation and deliver impactful solutions.

Skills

Technical Skills:

- Python (Data manipulation, Machine learning model development)
- TensorFlow, scikit-learn (Model building, Evaluation)
- AWS (Model deployment, Data storage)

Soft Skills:

- Analytical & Problem-Solving
- Communication & Collaboration
- Attention to Detail

Projects

Chatbot for Customer Service

- Description: Developed a chatbot using NLP to automate customer support interactions, handle inquiries, and provide product recommendations.
- Outcomes: Demonstrated proficiency in NLP and dialogue management, achieved a functional prototype handling simulated customer queries effectively, and showcased potential for real-world application in customer service automation.

Targeted Advertising with Recommendation Systems

- Description: Created a recommendation system prototype to suggest products based on user preferences and behavior using collaborative filtering and content-based filtering approaches.
- Outcomes: Implemented a functional prototype demonstrating personalized recommendation capabilities, simulated user interactions to validate system accuracy, and highlighted potential for enhancing user engagement through tailored content suggestions.
