

NAME

[Phone Number] | [Email Address] | [Portfolio Website (Optional)]

Career Objective

Passionate AI Engineer with hands-on experience in machine learning and AI-driven solutions. Eager to leverage my skills in Python, TensorFlow, and cloud platforms to develop innovative AI applications that solve real-world problems and drive business success.

Skills

Technical Skills:

- Machine Learning Libraries: TensorFlow, PyTorch, scikit-learn
- Programming Languages: Python
- Data Analysis Tools: NumPy, Pandas
- Deep Learning: Convolutional Neural Networks (CNNs)
- Version Control: Git

Soft Skills:

- Analytical & Problem-Solving
- Communication & Collaboration
- Attention to Detail

Projects

Sentiment Analysis Tool

- Description: Created a sentiment analysis application using Python, scikit-learn, and natural language processing techniques. Processed and analyzed large volumes of social media data to classify text sentiments.
- Outcomes: Delivered actionable insights from social media data, highlighting proficiency in NLP and data preprocessing.

Interactive Customer Support Chatbot

- Description: Build an AI-powered chatbot using NLP and machine learning to efficiently handle customer queries. The chatbot acts as a virtual assistant, offering instant responses and guiding users through support scenarios.
- Outcomes: Showcases expertise in NLP and machine learning for conversational AI. Enhances customer service by automating responses and reducing response times.
